

Building Global Momentum for Adult Vaccination Policy within COVID-19:

Protecting Progress in Accessing Adult Vaccination

This webinar series has been supported by an unrestricted educational grant from Pfizer

» Vaccine Safety

90%
of countries in the world
reported an increase in vaccination
hesitancy.

With the **increased burden**
on the healthcare system during
the COVID-19 pandemic, it is
vital to protect the
progress made in the
vaccination rates.

Life Course Approach «

“The **UN Decade of Healthy Ageing**
highlights the life course approach to vaccination.
It was stated that **25 years** of progress in vaccine
coverage have disappeared in **25 weeks.**”

- Ms Martha Rebour, Executive Director, Shot@Life

» Addressing Barriers

“95% of COVID-19 deaths
occurred in those **older than 60 years.**

According to FIP data from 2020,
it is not difficult to see the **significant
role of community pharmacists**
to act as gateway to increase convenience
of access”.

- Mr. Lars-Åke Söderlund, President, Community Pharmacy
Section of the International Pharmaceutical Federation (FIP)
